Navigate to the .tclxg file using the default open file dialog box and click Open. The test level results correspond to individual test items or individual tests in a project. Other possible values include JSON and Python: http: // localhost: 8080/job/my%20job/241/test Complete/api/json http: // localhost: 8080/job/my%20job/241/testcomplete/api/python The easiest way to get the URL is to open the page with the build results in a browser, copy the URL of the browser address bar and add the structure/TestComplete/API/{ Data-format} constant Here is an example of XML Data Jenkins data returns. The server name in our example is localhost. Click Show Count to view the number of tests run instead of time. Depending on the test results, the following status can be displayed: the Fault Description status when starting the test has not been started. Unlike the JUNIT-style reports described below, the TestComplete test step will not publish this report automatically. You can view them on the following pages: Project status page Page Page Project status page On this page, Jenkins displays a graph with test results for the compilations that created Junit style reports. In addition, in our example, we use port 8080 - the standard door that Jenkins uses. In our example, we use XML. FAILDSTART - ¶If the test was started. URL ¶ ä ä ¶ O URL you can use to see the results of the test. Your server can use another door. See also integration with jenkinspreparing jenkins not to Testcomplete Tests The Jenkins Testcomplete plug-in is not ignoring the tests, so the number of ignored tests is always 0. GREATING CONTAGES Only the compilations for which junit style reports were generated: Click on the image to enlarge it. At the top of the päanna, Jenkins displays summary information about the tests performed and their total execution time. If you need to specify only the path of the artifacts and the name of the file, you may omit the name artifacts of the parano - for example the records and artifacts of Build/Libs/***. Click on the grade to view detailed results for the necessary compilation. To view a detailed test log from a test execution, click the test name. To display the results of the latest compilation test, click on the latest outcome of the left test or click on the most right building in the grade. When test failures, it is usually grabbing Jenkins built artifacts for dwarf and local investigation. In the test result of the test, you can examine the results of a test execution. Exitcode - The Sandy Code returned by the testcomplete. The execution of the pipeline, by pattern, will proceed even when the construction is utmost. To obtain information on how to view the testcomplete test results, also see the results of the viewers in web browsers. JENKINSFILE (declarative pipeline) {agent any stages {stage ('test')} {steis ('. XML ')}} Tokgle Script Pipeline (Advanced) Jenkinsfile (Nä³ of Pipeline Script) {Try {Stage (' Test ') {sh'. XML '}} This will always take the test results and let Jenkins track, calculate tendencies and report them. No errors or warnings were approved during the execution of the test. nohtyP nohtyP e NOSJ sotamrof son sodatluser ,ofÄÄÄurtsnoc assen etset ed sepÄÄÄucexe sa erbos sepÄÄÄamrofni razilausiv arap alebat an ofÄÄÄurtsnoc ed orem³Än mu me ossap staciftrAoviuqra o moc otief etnemlicaf ©Ä ossI .sepÄÄÄalpmoc saus arap setset ed sacitsÄtate sa ebixe air³ÄtsiH anigjÄp Ä ocir³Ätsih ed anigjÄP .ahlaf a erbos sepÄÄÄamrofni rev arap ofÄÄÄæs atsen meti mu me euqilC .railpma arap megami an euqilC :XgoLct(elif goL daolnwod ofÄÄÄotob on euqilC , XgoLct. otamrof on etset ed gol o raxiab arap , uonimret etset o e uerroco orre muhnen sam ,sadartsiger marof osiva ed snegasneM osiva ,etset od emon o e }stpircs arap(tpircs ed edadinu ad emon ,otejorp od meti od emon ,otejorp od emon o iulcni ,sele erbos sepÄÄÄamrofni rev arap setseT so sodot³ ofÄÄÄæs an sneti me euqilC ,enilepiP ad ofÄÄÄucexe a etmarud sodareg soviuqra ,sotafitra³ ranezamra arap sniknej ed odargetni etropus olep ocitjÄrp otief ©Ä ossI ,oxiaba otricsed tinUJ öiltse ed oir³Ätaler od eretid otamrof etsE :atoN ,oir³Ätaler ed s³Än soirjÄv ofÄret sodatluser so ,etelpmoCtseT sossap soirjÄv revit oñlabart ues o es ,megatsop ed ofÄÄÄæs a somerasu ,sotafetra o etset ed sodatluser sossan rateloc arap ,odatucexe etset od etelpmoc emon O ä emon etset ed etset ,adreuqe Ä unem on odatlusef etseT me odnaclic uo ,sniknej otejorp ues od air³ÄtsiH uo sutatS anigjÄp an ofÄÄÄalpmoc ed knil mu me odnaclic etset od odatluseR anigjÄP Ä agehc ³ÄcoV etset od sodatluser ed anigjÄP ,noitcAyrammuSct ©Ä ziar ³Än o ,LMX otamrof o rasu ³Äcov eS >noitcAyrammuSct< >troper/< >lru/< 4576353/stroper/etelpmoCtseT/6/hojTseT/boj/0808:tsohlacol//pth .moc< >noitarud< >sehlatet< >mega/nega< >troper< >noitcAyrammuSct.etelpmoctset.snigulp.sniknej.ræbtrams.moc"=ssalc noitcAyrammuSct< edoC ypoCLMX :sotnemelE An expression of file lubrication, as shown in the example below: Jenkinsfile (Pipline Declarative) {agent any stages {Stage ('Build')} {Steps (sh './gradlew Built')}} stage ('teste') {Etapas (sh './gradlew check')}} post {always [archiveartifacts artefacts: 'build/libs/**/*' . } Toggle the script (advanced) Jenkinsfile (oleoduct with script) {try {STAGE ('test')} {sh 'buildfat.jar', Fingerprint: True Junit 'Build/Reports/**/*'. Xml'. If more than one parameter is specified in the stage of the ArchiveArtifacts, then the name of each parameter must be explicitly specified in the step code - that is, artifacts for the path and file name and the Artifact digital printing to choose this option. The graph at the top of the page shows the test run time and the proportion between failed and past tests. Failure errors occurred during the test run or the test did not end. The page displays a summary of TestComplete test executions, information about which tests of us have been executed, their run time and the number of errors and registered warnings. For example, you can use the JUNIT -in plug to publish a report. The All Tests section provides brief information about the tests executed from TestComplete during the construction process: the package level results in this section represent the project project. Click the Download Log File (MHT) button: Click on the image to amplify it. Timestamp - time went from January 1, 1970 to the start of the test (in milliseconds). False if the test didn't start. In the scripted syntax, you can check CurrentBuild .CurrentResult = 'Success'. See the feedback here. You can also configure the build to export to multiple formats. Click Add description to specify a descriptionthe execution of the test. 241 - The number of work (decimal, whole number). Résidence officielle des rois de France, le château de Versailles et ses jardins comptent parmi les plus illustres monuments du patrimoine mondial et constituent la plus complète réalisation de l'art français du XVIIe siècle. Step 5 – Next click the option to Add post-build option and choose the option of “Publish Junit test result report” Step 6 – In the Test reports XML’s, enter the location as shown below. Ensure that Reports is a folder which is created in the HelloWorld project workspace. The “*.xml” basically tells Jenkins to pick up the result ... Allure Framework is a flexible lightweight multi-language test report tool that not only shows a very concise representation of what have been tested in a neat web report form, but allows everyone participating in the development process to extract maximum of useful information from everyday execution of tests.
